Tasmanian Tiger® TT Plate Carrier QR LC Receives an Overall Score of 3.95 out of Five In the 2024 NTOA Member Tested and Recommended Program

The TT Plate Carrier QR LC was field-tested and recommended by law enforcement officers in the National Tactical Officers Association (NTOA) Member Tested and Recommended Program.

Knoxville, Tenn. (June 2024) – [Tasmanian Tiger®](http://www.tasmaniantigerusa.com), a tactical nylon line of products distributed exclusively for the US market by Proforce Equipment, Inc., is proud to announce that the [TT Plate Carrier QR LC](#) received an overall score of 3.95 out of five from the [National Tactical Officers Association \(NTOA\) Member Tested and Recommended Program](#).

The TT Plate Carrier QR LC was reviewed by three members of the NTOA. As part of the Member Tested and Recommended Program, the officers tested the TT Plate Carrier QR LC while on the job for maximum testing for design, performance, application, versatility, and other pertinent features.

"I really enjoyed this plate carrier. You can wear it for hours and not get fatigued in the neck/trap area. The quick disconnect is also a plus and takes away the noise factor of Velcro," review by the Nebraska Officer.

The officer from Nebraska opted to switch out the original cummerbund for the MOLLE Style cummerbund that came with the TT Plate Carrier QR LC for comfort and to provide more room for gear.

"This plate carrier is exceptionally lightweight, thanks to its laser-cut MOLLE system. This translates to unmatched agility and freedom of movement during critical operations. Our SWAT team members felt unrestricted and reported a significant improvement in maneuverability compared to bulkier carriers," review by the Arkansas Officer.

The officer reviewing the TT Plate Carrier QR LC from Arkansas is part of a SWAT Team that rigorously tested the plate carrier. He deemed it an excellent choice for SWAT teams and tactical professionals who prioritize lightweight mobility and ease of use without compromising on protection. The team appreciated the streamlined design which made the carrier snag-free when going through tight spaces. He also liked the ROC

buckle that allowed for swift removal of the plate carrier in emergencies, proving to be easy to use and reliable during the SWAT Team drills.

He concluded by saying “The Tasmanian Tiger Plate Carrier QR LC is a top-tier option for SWAT teams and tactical professionals seeking a lightweight, agile, and user-friendly plate carrier solution.”

This lightweight plate carrier is designed to offer a sleek and modern look, with a MOLLE system in laser-cut technology. The TT Plate Carrier QR LC is designed to fit SAPI plates of 12 x 10 in. (30 x 25 cm). It features a quick-release system with ROC buckle, which allows the wearer to quickly and easily remove the plate carrier in case of an emergency. The shoulder straps are adjustable, ranging from a minimum of 11 in. (28 cm) to a maximum of 20 in. (52 cm), providing a comfortable and customized fit for all users.

One of the most notable features of the TT Plate Carrier QR LC is its laser-cut MOLLE system, which gives the plate carrier a clean and streamlined look. The front and side areas of the plate carrier also feature a MOLLE system, which allows for individual customization and extension.

Additionally, the TT Plate Carrier QR LC is compatible with many other TT products, allowing for seamless integration. The plate carrier also includes an integrated radio equipment pocket and switchable side sections for using pouches for ballistic side plates.

The TT Plate Carrier QR LC weighs 2.87 lbs. and is made from Cordura® 700 Denier (MultiCam 500 Denier). It is available in Black, Olive, and Coyote for an MSRP of \$449.00 and MultiCam for an MSRP of \$499.00.

About Tasmanian Tiger®

Tasmanian Tiger®, a division of Tatonka GmbH, is an international brand founded in 1999 to provide user-design-driven nylon products to elite warfighters and law enforcement in Europe, Asia, and now North America. From prototype to production, all products are manufactured in the company's own facilities, thus ensuring a consistently high level of quality throughout the production processes. All products are quality-checked before leaving the facility and checked regularly by independent international test centers.
