

FOR IMMEDIATE RELEASE

Zaffiri Precision Unleashes “Glock-O-Ween” Sale Amid 2025 GLOCK® Shortage

Receive ten percent off all GLOCK® parts and accessories with code ZPUNDEAD now through Nov. 3, 2025.

Largo, Fla. (October 2025) – [Zaffiri Precision](https://zaffiriprecision.com), a leading innovator in precision-engineered firearm components, has announced its limited-time “Glock-O-Ween” promotion. Customers will receive a ten percent discount on all GLOCK®-compatible slides, barrels, complete uppers, and accessories. The sale runs now through Monday, Nov. 3, 2025, at 11:59 PM EST, and can be redeemed using promo code ZPUNDEAD at checkout. Customers are urged to shop immediately, as high-demand items are expected to sell out before the end of the sale.

The announcement comes at a pivotal moment for the handgun market. Following Glock’s official discontinuation of all Gen 1 through Gen 5 full-size pistol models, the industry is facing what insiders are calling the “Great Glock Shortage of 2025.” Distributors and dealers across the country report that inventories of popular Glock configurations are rapidly depleting, creating renewed urgency among both end users and OEM partners to secure aftermarket components.

Zaffiri Precision has responded decisively to this market disruption by expanding its production capacity and accelerating output across its Florida manufacturing facility. The company, known for its high-tolerance CNC-machined slides and barrels, is leveraging its robust domestic supply chain to meet surging demand. Its product lineup includes a comprehensive range of Glock-compatible slides, match-grade barrels, and complete upper assemblies designed for Gen 3, Gen 4, and Gen 5 platforms.

“This isn’t just a sale; it’s a survival event,” said Thom Kuss, Director of Marketing at Zaffiri Precision. “With Glock halting production on key models, our customers are relying on us to fill the gap with premium, U.S.-made components. We’ve ramped up capacity to ensure shooters, gunsmiths, and retailers can continue building and supporting Glock-pattern handguns long after OEM inventories are gone. Glock owners who want to upgrade or secure parts before the drought hits need to act now. Once November 3rd passes, this deal is dead – permanently.”

Zaffiri Precision has become a key supplier in the aftermarket slide and barrel segment, serving individual shooters, builders, and dealer partners across the U.S. The company’s focus on precision engineering, design innovation, and aesthetic customization has helped it establish a strong foothold within the competitive handgun components market. Its catalog also extends to parts of Sig Sauer and other popular platforms, supported by a robust online resource center and domestic customer service network.

Zaffiri Precision manufactures all slides and components in-house at its Largo, Florida, facility. The company is not affiliated with Glock, Inc. or Glock Ges.m.b.H. References to Glock are for compatibility purposes only.
