## Zaffiri Precision to Unveil Revamped Product Lineup and New Firearms at SHOT Show® 2026

*Visit Booth 72755 at SHOT Show® 2026, Jan 20 – 23, 2026, to be held at the Venetian + Caesars Forum in Las Vegas, Nevada.*

**Largo, Fla. (December 2025)** – [Zaffiri Precision](https://zaffiriprecision.com), a leading manufacturer of high-quality aftermarket slides, barrels, and components for Glock® and SIG Sauer® pistols, will showcase its entirely refreshed product lineup at [SHOT Show® 2026](https://shotshow.com), to be held Jan. 20 – 23, 2026, at the Venetian + Caesars Forum in Las Vegas, Nevada. For the first time in Zaffiri Precision's history, it will also officially introduce three new complete pistols at Booth 72755. Launching in Jan. 2026, the company is shifting focus from its popular à la carte "build-your-own" custom slide model to a new series of pre-configured, rigorously tested, and highly reliable complete uppers designed as direct bolt-on upgrades.

These ready-to-install complete uppers are organized into five distinct tiers: ZULU, ECHO, X-RAY, VECTOR, and IBS. Each tier offers a base model and a premium Elite variant. Elite models come equipped with high-end features, including tritium suppressor-height night sights, stainless steel guide rods, billet extractors, and steel back plates for enhanced performance and durability.

Here's an overview of the new lineup:

### **ZULU / ZULU Ported / ZULU Elite**

The ZULU series is a function-first design prioritizing reliability and performance with a clean, duty-oriented aesthetic that stays close to the stock OEM look. It includes front and rear serrations, balanced weight-reduction cuts, and an RMR optic cut. The ZULU Elite adds a threaded barrel, upgraded backplate, stainless steel guide rod, and suppressor-height tritium night sights for added versatility in suppressed or compensated setups.

### **ECHO / ECHO Elite**

The ECHO combines aggressive styling with practical functionality, featuring angled serrations, distinctive window cuts, and a sleek, modern profile. It offers excellent slide manipulation and balanced weight

reduction without compromising durability. The ECHO Elite includes a threaded barrel, upgraded backplate, stainless steel guide rod, and suppressor-height tritium night sights for smoother operation and premium refinement.

### **X-RAY / X-RAY Elite**

The X-RAY stands out with geometric window cuts and a competition-inspired design that maximizes weight reduction and quick handling. Ideal for shooters balancing speed, aesthetics, and performance, it features front/rear serrations and an optic-ready platform. The X-RAY Elite upgrades include a threaded barrel, stainless steel guide rod, upgraded backplate, and suppressor-height tritium night sights for superior recoil control and modularity.

### **VECTOR / VECTOR Elite**

The VECTOR features sharp directional cuts, aggressive serrations, and a dual-finish treatment of high-polished surfaces paired with Zaffiri Precision's Super Grip Black for striking contrast and superior grip. It delivers tactical refinement and confident handling. The VECTOR Elite adds a threaded barrel, stainless steel guide rod, upgraded backplate, and suppressor-height tritium night sights while preserving the signature aesthetic.

### **IBS (Integrated Barrel System) / IBS Elite**

The IBS is built for maximum recoil management and flatter shooting through Zaffiri Precision's signature integrated chunk-ported design, redirecting gases directly in the slide for reduced muzzle rise. It offers bold styling with competition-level speed. The IBS Elite provides two configurations: one with a threaded barrel and another with an Elite ported barrel. Both configurations include an upgraded backplate, stainless steel guide rod, and suppressor-height tritium night sights.

Custom builders can still access Zaffiri Precision's full range of individual parts and accessories, including popular titanium nitride finishes.

Visit Zaffiri Precision at Booth 72755 during SHOT Show 2026 to experience the new lineup firsthand.
