

FOR IMMEDIATE RELEASE

## Tasmanian Tiger® Expands Modular Load-Carrying System with New Chest Rig and Pack

*New TT Modular Chest Rig 4xM4 and Modular Chest Rig Pack deliver scalable, mission-ready versatility for military, law enforcement, and SWAT operators.*

**Knoxville, Tenn. (March 2026)** – [Tasmanian Tiger®](https://www.tasmaniantigerusa.com), a tactical nylon line of products distributed exclusively for the US market by Proforce Equipment, Inc., announces the release of two new modular load-bearing solutions: the TT Modular Chest Rig 4xM4 and the TT Modular Chest Rig Pack. Designed to work together or independently, the new systems provide adaptable, low-profile load carriage for military, law enforcement, and SWAT missions.

Built around mission modularity, the [TT Modular Chest Rig 4xM4](#) is a flat, lightweight chest rig featuring four fixed rifle magazine pouches and integrated compatibility with size M SAPI plates. The rig can be worn standalone, attached to plate carriers as a front panel, or combined with the new [TT Modular Chest Rig Pack](#) for expanded sustainment capability.

Constructed from CORDURA® 500 den with laser-cut MOLLE, the chest rig offers durability without excess bulk. Adjustable and removable shoulder padding, detachable side pouches, and replaceable main buckles allow operators to tailor the setup to their operational requirements. The rig also supports a tight shooting stance through optimized folding geometry and includes a removable 3D polymer pull tab for rapid magazine access.

The TT Modular Chest Rig 4xM4 weighs 1.9 lbs. (0.866 kg). It is available in black, olive, and coyote for an MSRP of \$219. Multicam is available at an MSRP of \$259.

To complement the front-mounted rig, Tasmanian Tiger introduces the [TT Modular Chest Rig Pack](#), a low-profile backpack engineered to integrate directly with the TT Chest Rig 4xM4. The pack includes a dedicated plate compartment for size M SAPI panels and offers expandable storage from 12 to 20 liters, making it suitable for patrol, direction action, or extended operations.

The pack features a narrow main compartment, three fleece-lined front pockets with hook-and-loop organization, hydration compatibility, and internal zippered pockets for mission essentials. Included adapters allow the pack to be mounted to plate carriers or used as a back section on the TT Chest Rig MKII and MKII M4 systems, providing cross-platform compatibility within the Tasmanian Tiger ecosystem.

The TT Modular Chest Rig Pack measures 16.5x10x2.5 in. (42x25x6.5cm) with a 20-liter (1220 cubic inches) volume. It weighs in at 2.3 lbs. (1.04kg). It is available in black, olive, and coyote for an MSRP of \$219. Multicam is available at an MSRP of \$279.

### **About Tasmanian Tiger®**

Tasmanian Tiger®, a division of Tatonka GmbH, is an international brand founded in 1999 to provide user-design-driven nylon products to elite warfighters and law enforcement in Europe, Asia, and now North America. From prototype to production, all products are manufactured in the company's own facilities, thus ensuring a consistently high level of quality throughout the production processes. All products are quality-checked before leaving the facility and checked regularly by independent international test centers.
