

FOR IMMEDIATE RELEASE

Tasmanian Tiger® Expands Medic Loadout Options with TT Rescue Pouch and TT Tourniquet Pouch III

Compact, mission-ready pouches deliver rapid access and organized storage for critical medic gear in tactical and first responder environments.

Knoxville, Tenn. (March 2026) – [Tasmanian Tiger®](https://www.tasmaniantigerusa.com), a tactical nylon line of products distributed exclusively for the US market by Proforce Equipment, Inc., introduces two new additions to its professional medic gear lineup: the [TT Rescue Pouch](#) and the [TT Tourniquet Pouch III](#), both engineered to enhance accessibility, organization, and deployment speed for life-saving equipment in the field. These new products reinforce Tasmanian Tiger’s commitment to delivering mission-focused equipment that meets the operational demands of military personnel, law enforcement, and first responders, where speed, reliability, and organization are critical.

The TT Rescue Pouch is a compact medic pouch designed for structured organization of essential medic supplies. Built with multiple compartments and elastic loops, the pouch allows users to customize loadouts for rapid identification and access. An adjustable and interchangeable grab handle, including alternative color options, supports quick retrieval, while a hook-and-loop panel on the back enables secure integration into larger Tasmanian Tiger backpacks and medic bags. Additional features include a front hook-and-loop strip for identification and a transparent document sleeve for quick-reference materials. Constructed from durable 420 HD Nylon, the pouch measures 8.7 x 5.1 x 3.15 in / 22 x 13 x 8 cm and weighs 9.3 oz. / 265g, balancing ruggedness with portability. Available in Black, Olive, and Coyote with an MSRP of \$69.95.

Complementing this release, the TT Tourniquet Pouch III is purpose-built for the secure and rapid deployment of tourniquets in high-pressure scenarios. The pouch features an all-around hook-and-loop closure system for immediate access, along with a snap-fastener for additional retention. Designed to accommodate the Combat Medical® Tactical Mechanical Tourniquet (TMT™), the pouch incorporates internal elastic loops and four customizable attachment points to ensure the tourniquet remains secure while allowing user-specific configuration. The MOLLE reverse system enables streamlined mounting, requiring only a single MOLLE loop, making it an efficient addition to any load-bearing platform. Constructed from CORDURA® 700 denier fabric (500 denier in Multicam), the pouch measures 5.5 x 2.5 x 1.4 inches / 14 x

About Tasmanian Tiger®

Tasmanian Tiger®, a division of Tatonka GmbH, is an international brand founded in 1999 to provide user-design-driven nylon products to elite warfighters and law enforcement in Europe, Asia, and now North America. From prototype to production, all products are manufactured in the company's own facilities, thus ensuring a consistently high level of quality throughout the production processes. All products are quality-checked before leaving the facility and checked regularly by independent international test centers.
