

FOR IMMEDIATE RELEASE

## **Tasmanian Tiger® Introduces the TT Base Pack 60 FO Long-Range Mission Backpack**

*Modular 60L pack with front-opening access, expandable capacity, and V2 Plus Carrying System designed for extended operations.*

**Knoxville, Tenn. (April 2026)** – [Tasmanian Tiger®](#), a tactical nylon line of products distributed exclusively for the US market by Proforce Equipment, Inc., announces the release of the [TT Base Pack 60 FO](#), a long-range mission backpack engineered for extended field operations and modular load management. The pack expands the brand's Base Pack family with a 60-liter platform featuring a large front-opening design (FO) that allows quick and efficient access to equipment in the field.

Designed for military, law enforcement, and professional users operating in demanding environments, the TT Base Pack 60 FO integrates Tasmanian Tiger's V2 Plus Carrying System, delivering stability and load distribution when carrying heavy equipment over long distances. A defining feature of the pack is its full front-opening main compartment, which allows users to quickly organize and retrieve mission-critical gear without unloading the pack.

The TT Base Pack 60 FO offers extensive modularity and adaptability for changing mission requirements. The pack features a height-adjustable, detachable lid with gear loops and an easy-access pocket, and when the lid is removed, a roll-top snow guard allows the pack to be securely closed while expanding the total capacity from 60 liters to approximately 75 liters. The pack is divided into main and bottom compartments for organized storage and is hydration system compatible, with antenna ports routed into the main compartment for communications equipment.

Additional functionality includes extensive MOLLE webbing on the front, sides, and lid for attaching mission-specific pouches and accessories, side compression straps, and perimeter base compression for load management, and fixation points for hiking poles or ice axes. The removable padded hip belt, which utilizes a pull-forward adjustment system, can also be detached and used independently as a Warrior Belt, offering additional flexibility for modular loadouts. A height-adjustable chest strap, multiple gear loops, and a front carry handle further enhance usability during demanding operations.

### **About Tasmanian Tiger®**

Tasmanian Tiger®, a division of Tatonka GmbH, is an international brand founded in 1999 to provide user-design-driven nylon products to elite warfighters and law enforcement in Europe, Asia, and now North America. From prototype to production, all products are manufactured in the company's own facilities, thus ensuring a consistently high level of quality throughout the production processes. All products are quality-checked before leaving the facility and checked regularly by independent international test centers.
