Tasmanian Tiger® Introduces the TT SGL Mag Pouch Clamp M4

New open-top magazine pouch combines integrated clamping system with MOLLE compatibility for Rapid Tactical Access.

Knoxville, Tenn. (April 2026) – [Tasmanian Tiger®](http://TasmanianTiger.com), a tactical nylon line of products distributed exclusively for the US market by Proforce Equipment, Inc., has launched the [TT SGL Mag Pouch Clamp M4](#), a purpose-built open magazine pouch engineered for M4/AR-15 platforms that integrates a plastic clamping device for secure retention and fast magazine deployment. Designed for operators and shooters who demand both speed and reliability, the pouch features an inserted plastic clip that holds M4 magazines firmly in place while allowing rapid insertion and removal under pressure. Elastic side compression and an elastic cord closure provide additional retention and adaptability across varying magazine sizes.

The TT SGL Mag Pouch Clamp M4 is particularly well-suited for belt carry and is compatible with both 2-inch (5mm) belts and MOLLE systems via reverse MOLLE attachment that requires two MOLLE loops, making it a strong option for use as a magazine return pouch. A removable 3D polymer pull tab further streamlines one-handed reloads.

Constructed from CORDURA® 700 den fabric (Multicam in 500 den), the single-capacity pouch weighs 4.2 oz/120g and measures 5.1 x 3.15 x 1 in. / 13 x 8 x 2.5 cm. It is available in black, olive, and coyote for an MSRP of \$49.95. Multicam is available at an MSRP of \$59.95.

About Tasmanian Tiger®

Tasmanian Tiger®, a division of Tatonka GmbH, is an international brand founded in 1999 to provide user-design-driven nylon products to elite warfighters and law enforcement in Europe, Asia, and now North America. From prototype to production, all products are manufactured in the company's own facilities, thus ensuring a consistently high level of quality throughout the production processes. All products are quality-checked before leaving the facility and checked regularly by independent international test centers.
