FOR IMMEDIATE RELEASE

## **Caracal USA®'s CMP9 Pistol Featured in Mrgunsngear Giveaway**

*Popular firearms reviewer Mrgunsngear is giving away a Caracal CMP9 or CMP9K pistol, offering one winner the choice between the platform's two configurations.*

**Nampa, Idaho (July 2026)** – [Caracal USA®](http://CaracalUSA.com), a leading U.S.-based manufacturer of small arms for the law enforcement and defense markets, today announced it has donated its CMP9 pistol platform for a new giveaway hosted by independent firearms reviewer [Mrgunsngear](http://Mrgunsngear.com). The promotion, which is operated and administered by Mrgunsngear, will award one winner their choice of a Caracal CMP9 or CMP9K pistol. Enter the giveaway at [t.lt02.net/lp/k4O30QUL/sweeps](http://t.lt02.net/lp/k4O30QUL/sweeps).

The giveaway follows Mrgunsngear's recent hands-on review of the CMP9 platform, in which Mrgunsngear evaluated the pistol's design, handling, and performance characteristics. The full review is available on [YouTube](https://www.youtube.com) and [Rumble](https://www.rumble.com).

"We're glad to see the CMP9 platform getting this level of attention from someone as respected in the industry as Mrgunsngear," said Jeffrey Spalding, CEO and President of Caracal USA. "Opportunities like this let shooters see the CMP9 and CMP9K in action and get a clear look at what the platform can do before it's in their hands."

The CMP9 and CMP9K are 9x19mm NATO semi-automatic pistols that bring modern manufacturing and battle-proven design into a compact platform bridging the gap between pistol-caliber carbine and duty performance. The CMP9 features a 9-inch cold hammer-forged barrel, while the shorter CMP9K variant incorporates a 6-inch barrel for enhanced maneuverability in close-quarters or vehicle operations. Both models operate on an advanced blowback system and feed from widely available MP5-style magazines, with fully ambidextrous AR/M4-style controls designed to deliver immediate familiarity for professional users while offering adaptability for personal defense and recreational shooting.

Both models are built on a machined 7075-T6 aluminum forend for durability under extreme conditions. The cold hammer-forged barrels are designed for exceptional accuracy and endurance, including the ability to withstand bore obstructions. Each pistol includes a machined 1913 Picatinny rail mount on the lower receiver for a variety of buttstock and pistol brace options (not included with the firearm), along with an M-LOK handguard with accessory slots at the 3, 6, and 9 o'clock positions for mounting flexibility.

Weighing just under five pounds, the CMP9 and CMP9K balance durability with maneuverability. Both models feature a flash hider threaded onto a ½-28 thread pitch, an ambidextrous charging handle and AR/M4-compatible pistol grips for customization. The advanced blowback system is designed to minimize felt recoil and deliver smooth cycling, even during sustained fire.
