

FOR IMMEDIATE RELEASE

Tasmanian Tiger®'s TT Modular Medic Combat Pack 18 Earns Silver Rating in NTOA's Member Tested and Recommended Program

Independent field testers scored the modular trauma pack 4.43 out of 5, praising its rugged build and mission-specific configurability for tactical medic response.

Knoxville, Tenn. (July 2026) – [Tasmanian Tiger®](#), a tactical nylon line of products distributed exclusively for the US market by Proforce Equipment, Inc., announced today that its [TT Modular Medic Combat Pack 18](#) has been tested and recommended by the [National Tactical Officers Association \(NTOA\) Member Tested and Recommended Program \(MTRP\)](#), earning an overall score of 4.43 out of 5, placing it in the program's Silver tier. Four NTOA-affiliated field testers, including active-duty law enforcement personnel from Vermont, Nebraska, California, and New Jersey, evaluated the 18-liter pack across categories including design, durability, storage, versatility, and ease of use.

"I love this bag. It arrived, and I thought it was going to be too small for my equipment, but to my surprise it fit everything I wanted to put in it," wrote the California-based tester, who gave the pack an individual score of 4.53. "I have thrown this around on search warrants, it has fallen out of my vehicle, and it has held up great so far. I highly recommend this medical pack."

A Nebraska-based tester, who scored the pack 4.4, pointed to its build quality and adaptability across roles. "The overall construction and quality are very high. The materials are rugged, thick, and durable to withstand abuse in the field. [The pack] is recommended for any SWAT Medic or operator that carries specialized equipment in the field, is looking for a high-quality and durable pack for use in the field, and is looking for an extremely modular, user-specific layout tailored to them."

The TT Modular Medic Combat Pack 18 is an 18-liter tactical emergency medic backpack built from Cordura® fabric with YKK zippers and Woojin plastic hardware. A circumferential zipper opens the main compartment to the side, and robust carry handles on three sides support rapid extraction and multi-directional deployment. Inside, two removable panels of lightweight, sturdy Tegriss® material with fastening accessories organize the main compartment, alongside a removable pouch with a transparent lid, a long color-coded zippered pouch, a removable IV bag pouch, and an insert pocket for patient assessment cards.

MOLLE hook-and-loop surfaces on the interior allow for near-limitless modularity, while three front pockets, each with distinct internal compartments, feature exterior hook-and-loop surfaces for labeling with hook-and-loop strips or snap-light inserts. A compression sleeve attached to the bottom of the pack accommodates a rescue sling (sold separately). Removable, air-mesh-padded shoulder straps allow the pack to convert for use with a plate carrier, and laser-cut mounting points on each side carry up to four tourniquets.

A tester from New Jersey, who scored the pack 4.46, highlighted its construction and adaptability. “I found the bag extremely versatile and comfortable to carry. Overall, I would absolutely recommend this bag.”

The TT Modular Medic Combat Pack weighs 4.25 lbs./1.93kg and measures 18 x 10 x 6.7 in. / 45.75 x 25.4 x 17 cm. It is available in red, black, olive, and coyote for an MSRP of \$419. Multicam is available at an MSRP of \$499.

“Recognition from an organization as respected in the law enforcement community as the NTOA reflects the standard we hold ourselves to with every product we bring to market,” said Richard Lewis, President and CEO of Proforce Equipment, Inc. “Our medic carry systems are designed and tested to keep pace with what operators actually need in the field, and this rating from NTOA validates that approach.”

The MTRP has evaluated more than 3,000 products in real-world conditions since 2003 and is widely regarded by law enforcement agencies as a key resource in tactical equipment purchasing decisions. Results are shared with the law enforcement community through *The Tactical Edge* magazine, NTOA’s online database, its e-newsletters, and directly with manufacturers. Under NTOA’s MTRP rating scale, products scoring 3.00-3.99 receive the standard MTRP logo, 4.00-4.49 receive the Silver logo, and 4.50-5.00 receive the Gold logo.

About Tasmanian Tiger®

Tasmanian Tiger®, a division of Tatonka GmbH, is an international brand founded in 1999 to provide user-design-driven nylon products to elite warfighters and law enforcement in Europe, Asia, and now North America. From prototype to production, all products are manufactured in the company’s own facilities, thus ensuring a consistently high level of quality throughout the production processes. All products are quality-checked before leaving the facility and checked regularly by independent international test centers.
